To: Examiner D. Hoang
Re: Agenda for Interview on Application 10/785,198

Applicants thank the Examiner for considering an interview on the above-captioned case. Applicants would like to discuss at least the following bullet point. The Examiner is free to supplement and/or propose additional topics that he feels would advance prosecution.

- General discussion about differences between a signing access operation and authorizing access to data.
- Applicants would like to propose an amendment concerning access to data exclusively through a signature tool. In Khidekel, a user directly interacts with a security server 36 and in Ballantyne accessing users directly access the master library.
